CIRCULAR

Dear Students,

I hope this circular finds you all in good health and high spirits. As we all know, water is a precious resource, and it is our responsibility to conserve it for future generations. In this context, I would like to bring to your attention the simple yet effective act of turning off taps when not in use.

In our college premises, we consume a considerable amount of water every day, and it is imperative that we use it wisely. The act of turning off taps when not in use can help us conserve a significant amount of water and reduce our overall consumption. This small step can go a long way in reducing our carbon footprint and preserving this valuable resource.

I request you all to make it a habit to turn off taps when not in use, whether in the bathroom, laboratory, or any other place. Let us all take this pledge to conserve water and contribute to the global efforts of water conservation.

In conclusion, I urge you to adopt this simple yet effective habit of turning off taps and encourage your friends and peers to do the same. Together, we can make a positive impact and create a better future for ourselves and for the planet.

Thank you for your attention.

Wishing you all the best,

Fr Reji P Kurian

CIRCULAR

Subject: Urgent Request to Report Water Leaks

Dear Students and Faculty,

I hope this message finds you well. I am writing to request your assistance in our efforts to conserve water on campus. As we all know, water is a precious resource, and it is important that we take every measure to ensure that it is used efficiently.

I would like to bring to your attention that even small leaks in pipes and taps can result in significant water waste over time. It is essential that any leaks are reported and repaired as soon as possible to prevent further loss of this valuable resource.

I kindly ask all students and faculty members to immediately report any leaks in pipes or taps that they come across on campus to the maintenance department or to the relevant authorities. Your prompt action in this matter is greatly appreciated.

Thank you for your support in our efforts to conserve water. Together, we can make a difference and contribute to a sustainable future.

Sincerely,

Fr Reji P Kurian
